ELECTRONICS AND COMMUNICATIONS IN JAPAN

Part 1: Communications

VOLUME 72

CONTENTS FOR 1989

NUMBER 1

Page

Shinkichi Nishimoto: Time Sidelobe Suppression for Coded Pulse Compression via Nonlinear Optimization Method 1

Nozomu Hasebe and Kazuhiko Kobayashi: A Method of Measuring Shielding Effectiveness for Conducting Materials Using a Spherical Cell 10

Yoshihisa Kanada and Tetsuo Ikeda: Multiring Local Area Network System 24

Akira Shiozaki: A Multiple Address Data Communication System via Satellite Link . . . 33

Masaharu Komatsu: Characteristic Analysis of Continuous-Service-Type Multipacket Transmission with Restriction on Number of Packets in a Frame 39

Yutaka Matsumoto, Tetsuya Takine, Yutaka Takahashi, and Toshiharu Hawegawa: Gateway Buffer Size of Local Area Network 51

Takehiro Unno, Kenichi Takahashi, and Shuji Tasaka: Effects of Error Propagation on the Performance of Coding Schemes for Still Pictures 63

Hideaki Matsue, Hiroyuki Ohtsuka, and Takehiro Murase: Fully Digital Cross-Polarization Interference Canceller for Multilevel Digital Radio 73

Tetsuya Takine, Yutaka Takahashi, and Toshiharu Hasegawa: An Analysis for Interdeparture Process of a Polling System with Single Message Buffer at Each Station 86

Kunio Kamimura: Packet-Switched Network Design with Constraints on Circuit Discreteness 98

NUMBER 2

Hiroshi Saito and Takeo Abe: Methods of Estimating Traffic Matrices 1

Susumu Itoh, Ichiroh Naitoh, and Toshio Utsunomiya: Adaptive Vector Quantization of Prediction Error Signals for Images 9

Shoji Shimada and Junji Suzuki: A New Talker Location Recognition Through Sound Image Localization Control in Multipoint Teleconference System 20

Yoshio Kami and Risaburo Sato: Transient Response of a Transmission Line Excited by an Electromagnetic Wave of Arbitrary Waveform 29

Masashi Kuribayashi: Crosstalk Characteristics for Pair Cable with Multiple Bridged Taps 37

Ryoichi Tanaka and Yoshiteru Morihiro: Effects of Common Alternative Routing System by Satellite Circuit 48

Takashi Ono and Masato Mori: Analysis of Simultaneous Multibit Errors Induced by a Cosmic Ray in Onboard Memories 56

Takashi Kato, Makoto Ando, and Naohisa Goto: Characteristics of Array Antenna for Broadcasting Satellite 64

Masayuki Tanimoto, Nobuhiro Chiba, and Masahiro Kageyama: An Experimental System of One-Dimensional TAT Bandwidth Compression for Television Signals 77

Tsunehito Higashi, Makoto Tsubokawa, Yutaka Sasaki, and Shigeyuki Seikai: Evaluation Method of Mode Coupling in Polarization-Maintaining Fiber for Coherent Transmission 87

Miki Yamamoto, Hikaru Nakanishi, Yoshikazu Tezuka, Ichiro Akiyoshi, and Hidehiko Sanada: Approximate Analysis for Window-Controlled Packet Network with Finite Input Queue and Optimal Window Allocation 99

NUMBER 3

Page

Keiro Shinkawa and Masaki Noda: A Highly Stabilized FET Oscillator for Ku-Band Receiver 1

Hiroshi Kotera, Yoshinori Sakai, Kazuo Unemoto, Tomohiko Arikawa, and Timothy Tutt: Design of Audiographic Teleconferencing Terminal 10

Yukuo Hayashida, Shumji Fujii, and Yoshikazu Tezuka: Delay Performances of a Continuous ARQ System with Copy-Transmissions 19

Takeshi Nishida and Hideo Miyahara: Performance Evaluation for Spread-Spectrum Multiple-Acess Communication Systems 27

Michinari Shimoda and Tokuya Itakura: Scattering of Electromagnetic Plane Waves by Two Parallel Finite Planes 37

Toshihiro Onodera and Youichi Masuda: Analysis of DC-DC Converter Using Voltage-Resonant Switching Mode 49

Ki Chai Kim and Shinobu Tokumaru: A Cutoff Cavity Antenna with Resonant Posts . . 61

Toyofumi Takehaka: Analysis of a Nonpreemptive $\Sigma M_i/G/1(\Sigma N_i)$ System 75

Toyofimi Takenaka, Takeshi Akaike, and Kazumasa Takami: Characteristics and Approximation Methods of a Nonpreemptive $\Sigma M_i/G/1(\Sigma N_i)$ System 85

Nobuo Tomita and Makoto Ohmura: Low-Frequency Crosstalk Loss Characteristics of Balanced Cables 95

Hideaki Matsue: Vector Correlation Detection-Type Interference Canceller 106

NUMBER 4

Duk-Gyoo Kim, Tatsuhito Nakajima, and Eisuke Masada: Harmonic Analysis of a Capacitor-Filtered Rectifier with Line Impedance 1

Yoshikuni Onozato, Tatsuhito Kato, and Shoichi Noguchi: Stability Analysis of Combined Random/Reservation Access Methods 10

Yoshifumi Amemiya and Kango Tokushige: Development of the Transmission Equations Using Electromagnetic Field Theory on a Transmission Line Coupled with External Fields 18

Rongping Du, Hikaru Nakanishi, Yoshikazu Tezuka, Hiromi Okada, and Hidehiko Sanada: Performance Evaluation and Optimization of ALOHA Scheme with Capture Effect 27

Hiromi Ikebata and Hiromi Okada: Multichannel CSMA/CD with Hybrid Load Distribution/Region Distribution Scheme 39

Yasuhiro Nakamura and Kineo Matsui: A Unified Coding Method of Dithered Image and Text Data Using Micropatterns 50

Naoki Kawai and Takehiko Yoshino: Effect of Error Control System by Range Transmission for PCM Sound Broadcasting 57

Masatake Kaji: Polarization Characteristics in UHF-Band Mobile Radio Propagation 65

Masaru Nagaike and Takashi Ichiyanagi: Three-Dimensional Electromagnetic Analysis by the Subspace Synthesis Method 79

Yuji Sakamoto, Katuhiro Tajiri, Takaya Sawai, and Yoshinao Aoki: Detection of Objects Buried in Snow Using Multifrequency Holography 88

Masatoshi Shimizu, Hideo Kobayashi, and Nobuo Tomita: Optical-Loss Change Characteristics of Fiber Organizers for Optical-Fiber Cable Joints 96

Tsuneo Kuwabara and Hiroaki Koga: Flame-Resistant Optical Fiber Cable with Corrosion-Protective Painted Stainless Steel Sheath 106

NUMBER 5

Yoichi Kato, Naoki Mukawa, and Sakae Okubo: An Adaptive Orthogonal Transform Coding Algorithm for Images Utilizing Classification Technique 1

Tadashi Matsumoto: Chase's Second Algorithm Using Received Carrier Level as CMI for Decoding Block Codes in Mobile Data Communication 11

Kazuaki Takao: A Wideband Sidelobe Canceller for an Earth Station Antenna 20

Zaihua Luan and Shinsaku Mori: Delay and Jitter Property of Mutually Synchronized Networks Using Complete Digital PLLs 30

Page

Naoki Matsuo, Mitsuhiro Yuito, and Yukio Tokunaga: Introduction of Interleaving in Packet Voice Communications 40
Hiroshi Yamane, Hisaaki Kanamori, Tsuyoshi Ideguchi, and Tamio Motomitsu: Experimental Study on Shielding Effect for Shielding Cable in Metallic Duct 49
Koji Ohno, Kazuhiro Daikoku, and Shigeaki Ogose: Bit Error Rate Analysis for Frequency Deviation Companding and Expanding FM (Fredece FM) 58
Takashi Suga, Hirokimi Shirasaki, and Fujio Ishihara: Quantities of Higher-Mode Generations in Linearly Tapered Waveguides 66
Tomoyuki Ohtuka, Haruo Yamashita, Kazuo Yamaguchi, Hidetoshi Naitou, and Ryuichi Kondou: Single-Mode Fiber Transmission Using Edge-Emitting LED for Broadband Subscriber Loops 73
Sei-ichirou Sakai and Sadao Takaba: Communication Protocol for Vehicle Packet Communication System Using Continuously Allocated Small Zones 87
Hiroshi Tokunaga and Hiromichi Kawano: Traffic Congestion Control Based on Call Density Control 96
Takeaki Noda, Kazunori Uchida, and Toshiaki Matsunaga: Scattering of Electromagnetic Plane Wave by an Infinite Plane Grating on a Dielectric Slab for Oblique Incidence 108

NUMBER 6

Takahiko Yamada, Satoshi Ogawa, Masato Suyama and Yoshinori Hori: Fault Recovery Processing in a Switching Control Multiprocessor 1
Kazunobu Koremura: Experiments of Diffraction Error on MLS Elevation Guidance . 15
Norio Tamaki: Studies on Subscriber Line Equalizer Using Decision Feedback Equalizing Circuit 25
Nobuo Kuwabara and Hiroaki Koga: High Reliability FRP Strength Member for Nonmetallic Optical Fiber Cable 37
Toshihito Kanai: Exact Radio Link Design in Cellular Mobile Communication Systems 46
Jun-ichi Sango: FDM-FM Interference Evaluation on Digital Radio-Relay Systems . 55
Keiichi Uchimura, Junji Michida, Shinji Nozu and Teizo Aida: Malfunction of Digital Circuits Caused by Noise Induced in Breaking Electric Contacts . . . 63
Yoshiaki Shikata and Kimitoshi Funakawa: A Study on Layered Free Access Network 74
Nobumoto Yamane, Yoshitaka Morikawa and Hiroshi Hamada: An Image Data Compression Method Using Extrapolative Prediction-Discrete Sine Transform; in the Case of Two-Dimensional Coding 84
Akira Hayashi, Yutaka Mitsunaga and Hiroaki Koga: Optical Fiber Cable Flexibility Design under Plastic Deformation and Its Evaluation 94
Jun Sasaki: Low Temperature Optical Loss-Increase for Optical Fibers in Compound-Filled Cable Splice Closure 104

NUMBER 7

Yoshiaki Tanaka, Minoru Akiyama and Bengt Wallström: A Design Method for Cost Minimization of Highly Reliable Communication Networks 1
Yasushi Higashida, Masafumi Hagiwara, and Masao Nakagawa: Timing Extraction and Carrier Estimation for PSK Signal Block Demodulation System 8
Tsuneo Horiguchi, Masataka Nakazawa, and Masamitsu Tokuda: Multimode-Fiber-Type Optical Directional Coupler for OTDR Using Acoustooptical Deflector 17
Yasuyuki Maekawa, Nion Sock Chang, Akira Miyazaki, and Tetsuro Segawa: Accuracy of XPD Measurement at the CS-2 Experimental Earth Station Related to Satellite Tracking Systems 27
Jianqing Wang, Hiroshi Echigo, Tasuku Takagi, and Tsugio Sato: A Direction-Finding Algorithm of Reflected Waves Using Small-Sized Data Series Measured in Fresnel Region and Its Evaluation 34
Tatsuya Kashiwa, Norinobu Yoshida, Ichiro Fukai, and Shoichi Koike: Three-Dimensional Analysis of Patch Antenna by Bergeron's Method 44
Tadashi Takano and Masaaki Ui: Reflector Error of Large Deployable Antennas and Its Effects on Radiation Characteristics 55
Atsurou Sen, Nagayoshi Morita and Nobuaki Kumagai: Radiation Characteristics of Cutoff-Waveguide Applicators for Hyperthermia 65

Page

Hisao Yamamoto and Akiya Inoue: Service Choice Behavior Modeling of Telecommunication Users 76
Masayuki Tanimoto, Masahiro Kageyama and Masayuki Murakami: An Experimental System of Two-Dimensional TAT Bandwidth Compression for Television Signals 91
Mamoru Sawahashi, Yasushi Yamao and Kazuaki Murota: Multiphase Pulse Counting FM Demodulator 103

NUMBER 8

Shozo Tokinaga: Analysis of Demand-Assignment Schemes with Adaptive Reservation on Bus-Type LANs for Integrated Communications 1
Katsuhiko Yamamoto: Analysis of a DC Current Detector in a Highly Accurate DC-DC Converter 11
Hirokami Shirasaki and Fujio Ishihara: Properties of Tapered Circular Waveguide Cutoff Filters for TE_{01} Mode Millimeter-Waves 23
Masaaki Imai, Yoshihiro Ohtsuka and Yoshiaki Terasawa: Polarization Noise Due to Vibration of a Birefringent Single-Mode Fiber:Computer Simulation Analysis and Experiment 30
Jun Tajima: A New Channel Assignment Scheme in Demand-Assignment Radio Communications System 41
Koichi Sakai and Masanori Koshiba: Application of the Boundary-Element Method to an Infinitely Long Tunnel 53
Shinya Nogami and Shuichi Sumita: Approximate Analysis of Memory Contention in a Multiprocessor System with a Single Bus 65
Shin-ichi Watari: TV Interference from Foreign Transmitters and the Polarization Characteristics of Es-Propagation Wave 75
Takashi Nakamura, Keisuke Oda and Senji Yokokawa: Equivalent Transmission Lines of Wire Antennas and the Radiation Mechanism 85
Takahiro Sonoda and Syogo Kozaki: Reflection and Transmission of Gaussian Beam of a Uniaxially Anisotropic Medium 95
Etsuo Masuda: Traffic Evaluation of Channel-Reservation Methods to Improve the Imbalance among Internal Blocking Probabilities on a T-S-T Network 104

NUMBER 9

Yutaka Matsumoto, Yutaka Takahashi and Toshiharu Hasegawa: Performance Comparison of Two CSMA/CD Systems with Prioritized Retransmission 1
Yutaka Ishibashi and Akira Iwabuchi: Throughput Analysis of Adaptive ARQ Schemes . 14
Hideo Wataya: A Study of Bit Error Model on Digital Subscriber Transmission . . . 26
Hiroshi Watanabe, Ryohei Hoshino, Hideo Kuroda and Hideo Hashimoto: 64 kbits/s Video Coding Equipment Using Adaptive Tree-Search Vector Quantization 35
Masafumi Hagiwara and Masao Nakagawa: Performance of the Multisampling Digital Tanlock Loop and Its Extension 45
Masayoshi Enomoto, Minoru Nakano, Kenji Matsushita, and Eiji Shimizu: Half Duplex Optical Communication System Using an LED as Source- and Detector-Device 53
Yoichi Kato, Naoki Mukawa and Sakae Okubo: A Coding Control Algorithm for Motion Picture Coding Accomplishing Optimal Assignment of Coding Distortion to Time and Space Domains 63
Hideichi Sasaoka: Theoretical Analysis of Error Sequence Characteristics in Digital Land Mobile Radio Channels 74
Tetsu Sakata, Koichiro Wakasugi and Masaru Matsuo: Aircraft- and Satellite-Borne Synthetic Aperture Radar Images of Ocean Waves in Orbital Motions 84
Mitsuru Nomura, Tetsurou Fujii and Naohisa Ohta: Basic Characteristics of Variable Rate Interframe Video Coding 92
Keisuke Ogawa and Masayuki Sakamoto: Number of Subscribers and System Cost in Mobile Communication Systems 103

NUMBER 10

Kouichi Mutsuura and Hiromi Okada: A New Network Configuration with Local and Global Channels for Packet Radio Networks 1

Page

Ryuichi Iwata: Lowpass-Type Quasi-Optical Diplexer by Rectangular Metallic Patch Array 13
Sakae Chikara and Makoto Ando: Beam-Scanning Characteristics of Offset Reflector Antennas with Polarization Grids 23
Nozomu Hasebe, Mikio Hanabusa, Akihiro Kaneita, and Yoshihiro Takahashi: Passive Telemetry Using Radar Reflectors with Controllable Reflectivity 32
Kazuo Sato, Kazuhiro Matsumoto, Kyohei Fujimoto, and Kazuhiro Hirasawa: Characteristics of Planar Inverted-F Antenna on a Rectangular Conducting Body . . . 43
Yoshio Ebine and Kenichi Kagoshima: Multifrequency Dipole Antenna with Closed-Spaced Parasitic Elements 52
Tadahiko Maeda and Tasuku Morooka: Experimental Studies and Improvements on the Accuracy of the Indoor Random Field Measurement Method for Obtaining the Radiation Efficiency of Electrically Small Antennas 59
Hisashi Morishita, Kazuhiro Hirasawa, and Kyohei Fujimoto: Analysis of Microstrip Antenna 68
Wataru Chujo and Tasuku Teshirogi: A Microstrip Antenna of Circular Polarization over Wide Angles Using $\lambda/4$ Short-Circuit Patches 78
Masanobu Kominami, Hirohiko Yasuda, Takuji Uchibori, and Katsu Rokushima: Electromagnetically Coupled Microstrip Antennas with Circular Polarization . . 86
Kiyohiko Itoh, Hiroshi Iikuka, Yasutaka Ogawa, and Hiroshi Baba: A Crossed-Slot Antenna Backed by a Rectangular Cavity 94
Yoshihiko Konishi, Hitoshi Mizutamari, Shin-ichi Sato, Seiji Mano, and Takashi Katagi: Analysis and Design Methods of Planar Array Antennas with Slotted Waveguides Taking into Account Mutual Coupling 103

NUMBER 11

Norihito Kinoshita and Seiichi Sampei: Method of Rejecting Adjacent Channel Interference Using an Adaptive Equalizer 1
Shinichi Nomoto and Fumio Watanabe: Shaped Reflector Design for Small-Size Offset Dual Reflector Antennas 11
Makoto Ando, Hideo Sasazawa, Satoshi Nishikata, and Naohisa Goto: A Slot Design of Radial Line Slot Antennas 19
Jun-ichi Takada, Makoto Ando, and Naohisa Goto: A Beam-Tilted Linearly Polarized Radial Line Slot Antenna 27
Shigeru Makino, Norio Miyahara, Hitoshi Mizutamari, and Shuji Urasaki: Design of Meander-Line Polarizer with Three Layers 35
Tokumi Yokohara and Hideo Miyahara: Comparison of Stability for Various Routing-Procedures in Circuit-Switched Networks 43
Yasushi Wakahara and Yoshiaki Kakuda: Protocol Validation by Group Processing of Process State Transitions 52
Hiroji Kusaka, Akihito Iwai, and Fujio Nishida: Signal-to-Noise Ratio and Its Improvement Method of Direct Sequence Spread Spectrum Multiple Access Communication Systems Using FIR-IIR Filter 65
Koichi Sakai and Masanori Koshiba: Analysis of Electromagnetic Field Distribution in Tunnels with Branches and Bends 76
Kinji Kayanuma, Norio Tagawa, Matsuo Sekine, and Toshimitsu Musha: Suppression of Radar Clutter by Partial Auto-Correlation Method 87
Makoto Nakamura and Yasushi Takada: ARQ Scheme Reinforced with Past Acknowledgement Signals 93
Takerou Mizoguchi, Koosuke Harada, Tamotsu Ninomiya, and Masatoshi Nakahara: Noise Generation Mechanism in Cuk Converter 102

NUMBER 12

Masataka Ohta: Fluid Model to Analyze Overload Characteristics of a Telephone Network 1
Koozoo Nakamura, Yasuyuki Kojima, Masaharu Tadauchi, and Kunihiro Sakata: High-Speed Thermal Printing and Document Feed Technique for Facsimile Using MMR Coding Scheme over Telephone Network 10
Hiroshi Yamada: Measurement Accuracy of Carried Traffic for the Loss System with Heterogeneous Inputs 21

Page

Masayuki Tanimoto and Akio Yamada: Image Restoration for Complementary Subsampling System 34
Tohru Hatta, Takashi Kusakabe and Takahiro Asai: Required Accuracy in Manufacturing Process of Three-Wire Transmission Line Used in Inductive Radio System for Detecting Linear Motor Vehicle Position 42
Toyohiko Ishihara, Kazuhiro Shirai, Keiji Goto and Kohji Toda: High-Frequency Long-Range Propagation Phenomena in Semicylindrical Conducting Concave Boundary 59
Akira Kondo and Kenichi Kagoshima: Design and Characteristics of Low-Loss Polarization Grid 69
Toshiaki Matsunaga, Kazunori Uchida and Takeaki Noda: Electromagnetic Wave Propagation in a Two-Dimensional Tunnel with a Modified Cross-Junction . . . 79
Isamu Nagano and Masayoshi Mambo: An Evaluation of Systematic Errors in VLF Direction Findings via Full-Wave Analysis 88
Koso Murakami, Kazuo Hajikano and Shunji Abe: A Broadband ATM Switching System . 99
